Comments

The Precedents for Withdrawal *Bennett Ramberg* 2

As Washington ponders how long to stay in Iraq, it would do well to examine the strategic impact of the United States' withdrawal from Vietnam and Cambodia in the 1970s, Lebanon in the 1980s, and Somalia in the 1990s. In each case, disengagement eventually proved to be the right policy. With Iraq, too, getting out sooner rather than later is the United States' best chance to protect its interests.

The Japan Fallacy *Richard Katz* 9

Many commentators have said that the financial crisis of 2008 could lead the United States to replay Japan's "lost decade" of the 1990s. They are wrong. The U.S. financial crisis is smaller, and Washington has responded far more quickly than Tokyo did. Most important, the current crisis is the result of correctable policy mistakes rather than deep structural flaws in the U.S. economy.

Essays

Center Stage for the Twenty-first Century *Robert D. Kaplan* 16

Already the world's preeminent energy and trade interstate seaway, the Indian Ocean will matter even more in the future. One reason is that India and China, major trading partners locked in an uncomfortable embrace, are entering into a dynamic great-power rivalry in these waters—a competition that the United States, although now a declining hegemon, can keep in check by using its navy to act as a sea-based balancer.

Contents

How Development Leads to Democracy

Ronald Inglehart and Christian Welzel

33

Democratic institutions cannot be set up easily, anywhere, at any time; they are likely to emerge only when certain social and cultural conditions exist. But economic development and modernization push those conditions in the right direction by creating a self-reinforcing process that brings mass participation to politics and thus makes democracy increasingly likely.

Reshaping the World Order

Stephen G. Brooks and William C. Wohlforth

49

The current architecture of international institutions is so out of sync with the modern world that it must be updated. But skeptics question whether the United States is up to the task. They need not worry: the United States still possesses enough power and legitimacy to spearhead reform.

The Geoengineering Option

David G. Victor, M. Granger Morgan, Jay Apt, John Steinbruner, and Katharine Ricke

64

Climate change is accelerating, and policymakers may soon have to consider emergency strategies for curbing global warming. Engineering the climate strikes most people as a bad idea, but it is time to take it seriously, fund research on geoengineering, and develop international norms for its use.

Free at Last? *Bernard Lewis*

77

The Arab world has changed dramatically since the end of the Cold War, but it is still plagued by conflict, extremism, and underdevelopment. The future of the region will depend largely on the outcome of the battle between those advocating Islamic theocracy and those seeking to establish liberal democracy.

Germany's Russia Question *Constanze Stelzenmüller*

89

Buoyed by an increasingly activist foreign policy and a resilient economy, Germany has taken a leadership position in Europe. Perhaps most decisively, it is a bridge between Russia and the West, and how Berlin manages its relations with Moscow will set the tone for Europe's dealings with its resurgent neighbor.

Bank Shots *Rachel L. Loeffler*

101

Financial sanctions have become a key tool of U.S. foreign policy. Measures taken against Iran and North Korea make clear that this new financial statecraft can be effective, especially for confronting rogues. But true success will require persuading global banks to accept a shared sense of risk.

Cambodia's Curse *Joel Brinkley*

111

Thirty years after the fall of the Khmer Rouge, much of Cambodia remains mired in memories of the country's sorrowful past. Meanwhile, the rest of the world, whose perception is also skewed, barely seems to notice that the government of Prime Minister Hun Sen is destroying the nation.

Bruce Rutherford's *Egypt After Mubarak* is an ambitious effort to explain how the Muslim Brotherhood, the judiciary, and the business sector can work in parallel, if not exactly together, to influence Egypt's political future.
- The Missing Peaces**
Michael D. Bell, Daniel C. Kurtzer, and Prem G. Kumar 131
To resolve the Israeli-Palestinian conflict, policymakers will have to develop a new regime for Jerusalem's Old City. Striking an Israeli-Syrian deal that draws Damascus away from Tehran is also essential, but it will be harder than it appears.

3 PROVOCATIONS

7 The Coming Food Coups

■ *Andrew S. Natsios and Kelly W. Doley*

Historically, different political systems—particularly failed and totalitarian states—run different political and security risks as they face food price increases. If donor governments draw on traditional famine theory, they can better identify today's gravest risks and implement more effective responses.

27 No Way to Treat Our Friends: Recasting Recent U.S.–Georgian Relations ■ *Alexander Cooley and Lincoln A. Mitchell*

Two ultimately flawed U.S. policy principles—personalizing the relationship with Georgia and committing to maintain its territorial integrity—helped fail to anticipate or prevent the August 2008 escalation of conflict between Georgia and Russia, and should be reversed.

43 The Anbar Awakening: An Alliance of Incentives

■ *John A. McCary*

The September 2006 shift in Iraq's al Anbar province was caused neither by the number of U.S. troops in “the surge,” nor outrage at the brutality of al Qaeda's tactics, but the Sunni tribal sheikhs' increased sense of al Qaeda's threat to their power, leading them to align with the U.S. military and its new strategy.

61 Remember the Magnequench: An Object Lesson in Globalization

■ *Charles W. Freeman III*

The political significance of the 2006 closing of an Indiana factory owned by Magnequench, a firm with ties to China, illustrates the anxiety about globalization and the myth of manufacturing's overall economic significance in the United States today.

77 Where East Meets West: European Gas and Ukrainian Reality ■ *Edward Chow and Jonathan Elkind*

Ukraine is caught between the old, post-Soviet world and the new, European one that it wants to join. Nowhere are its dilemmas clearer and more consequential, both for Ukraine and for the Euro-Atlantic community, than in Ukraine's natural gas industry.

93 The Next Catastrophe: Ready or Not? ■ *Christine Wormuth*

The United States is still not ready for a domestic catastrophe. Four organizational steps should be taken to help build a homeland security system with clear lines of authority and guidelines to determine and assess the capabilities state and local authorities should have.

107 Reform, Don't Merge, the Homeland Security Council

■ *Paul N. Stockton*

Merging the Homeland Security Council into the National Security Council would impede the reforms most vital for securing the United States against future terrorist attacks and hurricanes or other natural hazards.

115 U.S. DEMOCRACY SUPPORT AFTER BUSH

117 Picture the Problem: Global Freedom, 2003–2007

119 Democracy: The Case for Opportunistic Idealism

■ *Gideon Rachman*

The new U.S. administration should adopt a policy of opportunistic idealism, retaining the idea that freedom and democracy are important U.S. foreign policy goals, but

recognizing that they must be pursued pragmatically and only when the opportunity arises.

129 The Baby, the Bathwater, and the Freedom Agenda in the Middle East ■ Michele Dunne

The new administration should not limit its judgment of regional democracy promotion to Iraq and Palestine, but should also incorporate lessons from Egypt, Bahrain, and Morocco where democracy has made headway without sacrificing U.S. strategic interests.

143 Asia's Challenged Democracies ■ Yun-han Chu, Larry Diamond, Andrew J. Nathan, and Doh Chull Shin

Public survey data from China, Hong Kong, Japan, and five new democracies reveals that East Asian democracies are in distress. Public satisfaction with the regime is highest in China, lowest in Japan and Taiwan, and fragile in the other new democracies.

159 Global Democracy Promotion: Seven Lessons for the New Administration ■ David Price

The chair of the House Democracy Assistance Commission, mindful of the mistakes of the past, offers seven practical lessons for the new administration to rethink and refine the theory and practice of democracy promotion.

RUSSIA: CRISIS, CONTINUITY AND RESTORATION

FROM IDEOLOGY TO PRAGMATISM: THE NEW COURSE OF RUSSIAN FOREIGN POLICY 14

Serena Giusti and *Tomislava Penkova* note that Russia has replaced the ideological guidelines of its Soviet days by pragmatic nationalism as post-imperial nuclear power striving to reassert its influence mostly by economic and cultural means. Furthermore, Russia is well poised to face crucial issues such as terrorism, pollution, high prices of commodities, energy supplies, etc. The Russia–West relationship is definitely not a zero-sum game, as in the past. Instead both parties can benefit from a fair dialogue.

RUSSIAN ATTITUDE TOWARDS INTERNATIONAL TERRORISM 56

Terrorism has been perpetrated at various times in history, to spread fear, destabilize existing regimes and acquire political power. Since the fall of the USSR, Russia has frequently been a target of terrorism and plays a critical role in any effective global strategy to confront it. *Pankaj Kumar* shows that since 2001 the Russian government has sought to cooperate with Western powers and all other nations for repressing terrorism. The response from NATO members has been ambiguous despite the help provided by the Kremlin to the Western alliance in theatres such as Afghanistan and Central Asia.

ORGANISING COOPERATION AND SECURITY IN GREATER EUROPE 66

Russia is a European nation which stretches across Northern Asia all the way to the Pacific. Its future therefore lies, at least in part with the EU, in spite of US inspired attempts to keep the two apart by perpetuating

the Cold War. *Henri De Grossouvre* and *Pierre Pascallon* suggest that the OSCE may provide the right platform to heal this historic rift and rebuild continental unity.

THE RUSSIAN ECONOMY IN THE ERA OF GLOBALISATION

70

O V Malysarov reviews the advent of the globalisation era in Russia, which coincided with drastic changes in its socio-economic structure, since the one that had existed in the Soviet Union was abruptly destroyed. The financial crash of August 17, 1998, was the inevitable outcome. The strategy for the socio-economic development of Russia (2008–20) envisages a transition from growth based on the export of raw materials to innovative and socially oriented development. It recognizes the creative potential of human capital as the leading factor of economic development. Although these moves and intentions are in the right direction, it will be difficult to implement them in the present environment.

THE ENERGY DIALOGUE BETWEEN RUSSIA AND THE UNITED STATES

104

On a number of occasions, former Russian President Vladimir Putin stated that the active involvement of his country in international and regional integration processes was one of the key instruments for the modernisation of the national economy. This was illustrated by the dialogue on energy issues between Russia and the United States, activated in 2003–5. *Alexandar Todorev* argues that the stability and predictability of world energy markets will depend largely upon the diplomatic efforts of both countries to find a sensible balance between various interests on global, regional and bilateral levels.

THE ENERGY GEOPOLICY OF THE UKRAINE

112

After the “Orange Revolution” of 2005 Ukraine, under the leadership of President Viktor Yushchenko, has become a strategic but fragile ally of the USA and NATO in their rivalry with Russia for influence in Eastern Europe, the Caucasus and Central Asia. To reduce Europe’s and its own energy dependency on Russian oil and gas, Ukraine has tried, with uncertain results, to build economic partnerships with

energy-producing Eurasian states and even with Iran, in the hope of bypassing Russian pipeline routes. However, as *Todor Kondakov* points out, this policy has not always been economically viable and has met with strong opposition from Russia, Kazakhstan, Belarus and within the Ukraine itself.

REVIEW ESSAY

THE DYNAMICS OF INDIA'S ECONOMIC DEVELOPMENT: NATIONAL AND INTERNATIONAL DIMENSIONS 122

The ongoing opening up of India's economy is concurrent with the country's rise as a great power and reflects its growing participation in global and regional trade fora. The Indian position at the WTO has evolved over the years. According to *Bharti Chhibber*, New Delhi's dissatisfaction with the pace and direction of world trade regime reforms has led it to pursue and conclude a number of regional trade associations as an alternative. Internal reforms tend to slow down in the present global context which forces the government to rethink deregulation policies, corruption remains a major problem and the decentralisation process is uneven across the country.
